Art Unit: 3632

This is an office action for serial number 10/769,200.

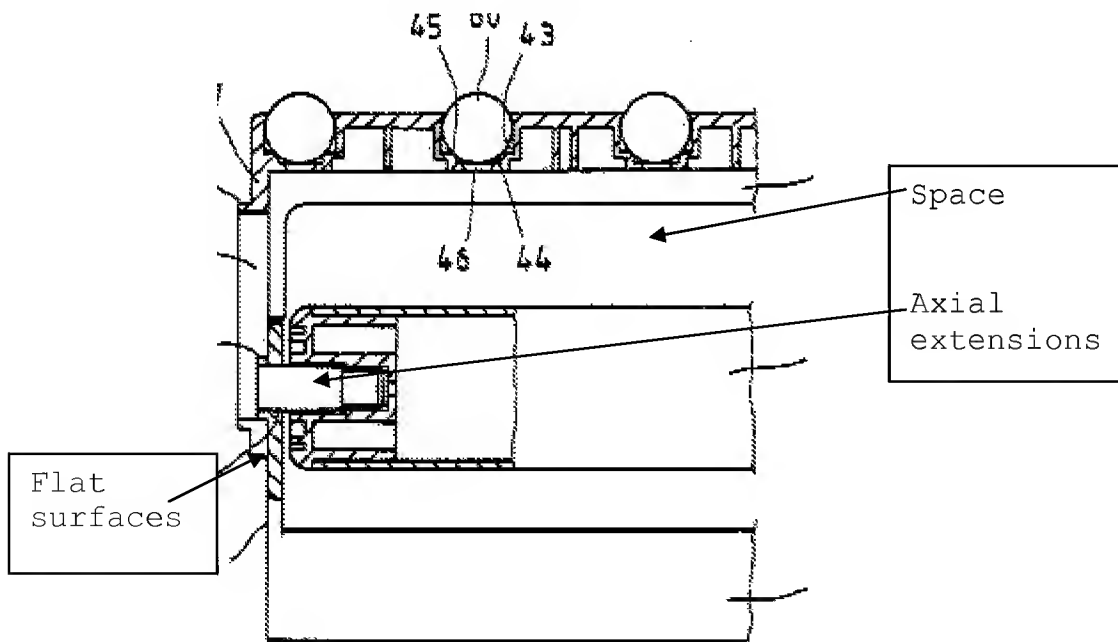

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 14-16, 22, and 25 are rejected under 35 U.S.C. 102(b) as being anticipated by Chen 6,279,717. Chen discloses a roller (30), lateral guide elements (50), active and (figure 2) inactive position (figure 4), space (see figure below), axial extensions (see figure below), frame (20).

Art Unit: 3632

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Chen 6,279,717 in view of Recker 3,849,007. Chen discloses all of the limitations of the claimed invention for an indicator for indicating directions of rotation. Recker discloses that it is known to have an indicator for indicating directions of rotation (column 2, lines 23ff) for the purpose of providing the proper direction for the active and inactive position to assist the user.

Allowable Subject Matter

Claims 3, 6-9, 17-21, 23, 24 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 4, 5, 10, 12, 13, 26-44 are allowed.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

The prior art discloses conventional roller stands.
